

**OpSite\* Post-Op** is a revolutionary post-operative dressing combining a high Moisture Vapour Transmission Rate (MVTR) film and the cushioning and absorbency of a low adherent pad together with an easy application carrier system. The hydrophilic polyurethane film on **OpSite Post-Op** has **REACTIC\*** properties that 'switch on' in the presence of moisture allowing any excess to transpire into the atmosphere.

**OpSite Post-Op offers the following advantages:**

**Bacterial barrier**

Protects the site against extrinsic contamination, reducing the risk of infection by bacteria.

**Waterproof film**

Patient can shower with the dressing in situ.

**Low allergy adhesive**

A unique grid pattern adhesive minimising the risk of an allergic response.

**Highly absorbent pad**

Rapidly absorbs serous exudate. Allows lateral spread across the pad to maximise absorbency and reduce the risk of skin maceration.

**Low adherence**

The wound contact layer enables exudate to pass through to allow minimal trauma on removal.

**Conformable**

Comfortable and non obtrusive for the patient.

**High MVTR**

The patented **REACTIC\*** film has a unique molecular structure with an MVTR of 11000g/m<sup>2</sup>/24hr<sup>3</sup>, making it significantly more permeable to water vapour than ordinary films in the presence of moisture.

**Round corners/thin film**

Reduces occurrence of lifting or snag, helping the dressing to stay in place for longer.

Code	Description	Items per unit	Price
66000710	12cm x 10cm	Each or 10 per box	\$4.45
66000712	15.5cm x 8.5cm	Each or 10 per box	\$4.95
66000713	20cm x 10cm	Each or 10 per box	\$5.65
