ECOLAB®

ENDURE MOISTURISING LOTION
Moisturising skin lotion

Endure Moisturising Lotion is a mild soothing moisturising lotion to protect hands from the harshness of occupational conditions and frequent hand washing in healthcare environments.

In the absence of a well-structured and effective moisturising cream, normal healthy skin quickly deteriorates leading to roughness, drying, defatting, chapping, inflamation and discomforting soreness. With regular applications **Endure Moisturising Lotion** helps care for "abused" skin and maintain the skin's barrier function to promote frequent hand hygiene.

Endure Moisturising Lotion is a mild soothing moisturising lotion to protect hands from the harshness of occupational conditions and should be used as per guidelines in healthcare environments (3 times a shift).

Endure Moisturising Lotion is compatible with both latex and nitrile gloves.

Endure Moisturising Lotion does not compromise antimicrobial efficacy protective barriers.

Gentle emollients incorporated in **Endure Moisturising Lotion** helps to nourish dry skin and to restore its natural moisture balance. Its non-greasy formulation is rapidly absorbed and will leave the skin feeling soft and smooth.

Constant hand washing in health care environments can leave hands dry, chapped and irritated. Moisturising is vital to ensure that hands are free from cracks where infection can start and to ensure that regular hand washing is maintained.
