

Aberdeen Vet Clinic, VIC - Sharron, Practice Manager
We use the Perfuvet® Twist for our hospitalised patients.
We find it much easier than regular admin sets, as it's not getting tangled around the patient's legs.

génia AUSTRALIA

KEEP CALM AND LOVE YOUR VET

PERFUVET® TWIST

REUSABLE ROTATING BASE

Allows the patient to move freely.

SPIRAL TUBING

Supports a tangle free system.

LUER-LOCK

Easy connection with the catheter.

IDEAL FOR
Neurological disorders
& overnight patients

Contact us for more information: contact@geniaaustralia.com - www.geniaaustralia.com

INSTRUCTIONS FOR USE

WHY DO YOU LOVE IT?

- When patients walk in circle in the cage the spiral tubing will follow their movements, thanks to the rotating base.
- Tubing will not tangle around the animal and will be less inclined to kink thanks to its spiral shape.
- It is ideal for hospitalized patients, overnight IV therapy, and patients with neurological disorders.
- It will improve safety and save time.

COMPANION ANIMAL PRACTICE, NSW - Dylan, Head Nurse: "We have definitely been using the Perfuvet® twist. They are a great product, each time we use them they are easy to install and the animals are about to move around the cage freely."

WYNYARD VET CLINIC, TAS - Jane, Vet Nurse: "The Perfuvet® Twist is brilliant! We used it last time for a little dog who was sick, and he didn't get tangled in the cage."
