

Reduce scratches and bites during dressing changes

Scratches and bites are common place when changing an adhesive dressing or a dressing that has bonded to skin or fur. Trio Adhesive remover spray reduces the trauma and pain of dressing changes by disrupting the adhesion with the dressing or bandage. The process of changing dressings is much quicker and safer for the veterinary professional or animal owner.

Less pain to the animal = less bites or scratches.

Sting Free Adhesive Remover

For fast, painless and atraumatic removal of adhesives from skin

The proven, silicone based technology of Trio™ *Sting Free* Adhesive Remover, releases adhesive dressings in seconds without causing pain or trauma to the animal being treated.

The silent spray, available in 50ml or 200ml (for larger areas of use), are designed to deliver a quiet spray action so as to avoid distress to the animal – the spray can be used at any angle. The all Silicone, *Sting Free* formulation, due to its low surface tension, tracks underneath the adhesive dressing temporarily disabling the adhesive to aid painless, atraumatic removal.

Trio™ *Sting Free* Adhesive Remover is hypoallergenic and sprays at any angle!

To remove sticky adhesive residue

Gently remove sticky residue from the skin, hair and fur with Trio™ *Sting Free* Adhesive Remover wipes to prepare the skin for the next adhesive product.

- Sprays at any angle
- Releases dressings from skin, hair and fur
- Does not sting, even on sore skin
- Releases adhesives quickly
- Dries in seconds – no residue
- Does not affect adhesion of next dressing
